

BODY FILLER SMICHAE

Body filler

SMICHAE

Smichae body filler, GMP certified
(production of medical devices and systems quality management).
This is a product that has been produced in pharmaceutical
production and has passed flawless sterilization and safety tests.
100% highly purified HA, an absolutely safe medical product.

ADVANTAGES

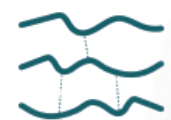

SMICHAE

High degree of purification

Raw material safety

High crosslinking rate 50%

Modern production method

Ultra-high concentration of 24 HA

SAFETY

SMICHAE

The product has undergone a high degree of purification. During the studies, no deviations from the norm were found. This guarantees the safety of using the product.

|| Hydronic acid — BDDE • RESIDUE

PRODUCT A

SMICHAE

WHY

If other products have a crosslinking rate of 10%, and the content of crosslinked material is only 5ml.

Therefore, even if the same amount is used, the results will last longer.

Due to the high crosslinking rate, when the bottle is turned upside down, air bubbles can be seen slowly rising to the top, unlike other products.

SMICHAE

SMICHAE

Crosslinking rate
50%

PRODUCT A

Crosslinking rate
10%

WHY

Since a monophasic filler has a denser distance between its molecules, it does not absorb water well, so it can retain its shape for a long period of time.

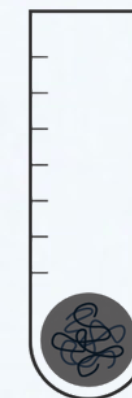

Uneven distribution due to poor cohesion. The ability to withstand external pressure is weak, and the period of effect is short.

Evenly distributed due to strong cohesion. Excellent viscoelasticity and high ability to withstand external pressure

SMICHAE

The ultra-high concentration form lasts longer and meets stability expectations.
